

ISHITA KHARDE

Pune, Maharashtra | 9322980351 | khardeishita@gmail.com

PROFESSIONAL SUMMARY

Engineering graduate with hands-on Python experience and a solid foundation in Object-Oriented Programming, Data Structures & Algorithms, and DBMS, plus AWS Cloud Practitioner certification. Experienced in building AI/ML applications, integrating REST APIs, and working with SQL databases and Git-based version control across the full software development life cycle. Delivered end-to-end technical projects independently and collaboratively, including a published, peer-reviewed AI system, with a strong track record of producing reliable, client-ready results.

TECHNICAL SKILLS

Programming Languages: Python, Java

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), DBMS, SDLC

AI/ML & Data: Deep learning (CNN, Xception architecture), YOLOv8 object detection, OCR pipelines, model training & evaluation

APIs & Integration: REST API integration and consumption (Gemini API), Flask REST API design

Database: MySQL

Cloud: AWS (Cloud Practitioner Essentials certified) — EC2, S3, Lambda fundamentals

Web Technologies: HTML, CSS, JavaScript

Tools & Version Control: Git, GitHub, VS Code, Eclipse

PROFESSIONAL EXPERIENCE

Project Intern — IIT Bombay

Oct 2024 – Mar 2025

- Built and deployed a CNN-based medical image classification system in Python (Xception architecture) to categorize MRI brain scans into four classes, achieving 99% training accuracy and 82.74% test accuracy.
- Owned the full development lifecycle — data preprocessing, model training, evaluation, and validation — applying SDLC practices while coordinating closely with faculty stakeholders to meet project milestones.
- Gained hands-on experience in applied deep learning, model evaluation, and technical documentation.

PROJECTS

DocuShield: AI-Based Document Forgery Detection System

- Developed an end-to-end, Python-based document verification system integrating YOLOv8n object detection, OCR text extraction, and the Gemini REST API to automate authentication and forgery detection.
- Designed the REST API integration and semantic validation layer to verify critical document fields and produce explainable, auditable classification results (Authentic / Suspicious / Needs Review).
- Published the underlying framework as a research paper (IJARCT, Feb 2026) and presented it at ICTSD-26, demonstrating the ability to communicate technical work clearly to broader audiences.

Resume Assistant: AI Chatbot for Resume Tailoring

- Built a full-stack Python chatbot that lets users upload a resume and job description, then ask questions or request tailored rewrites — integrating the Gemini REST API for context-aware responses.
- Designed a Flask REST API (upload, chat, and history endpoints) backed by SQLite for persistent session and conversation storage, with a graceful offline fallback mode when no API key is present.
- Structured the codebase into clean, testable modules (resume parsing, LLM client, database layer) and deployed it end-to-end with Git version control. Code: github.com/Ishitakharde/resume_assistant

EDUCATION

Bachelor of Engineering (Electronics and Telecommunication)

Nov 2022 – Jul 2026

Pune Vidyarthi Griha's College of Engineering and Technology, Pune

Higher Secondary Education (11th & 12th)

Jan 2020 – Mar 2022

Dr. D.Y. Patil Arts, Commerce and Science Junior College, Akurdi

CERTIFICATIONS & PUBLICATIONS

- AWS Cloud Practitioner Essentials — AWS (Oct 2025)
- Deep Learning — Nvidia (Sep 2025)
- Publication: "YOLO-OCR Framework for Academic Document" — IJARCT (Feb 2026)
- Presented "DocuShield: AI-Based Digital Document Forgery Detection System" — ICTSD-26
